

5

Ways in which t3 can enhance Enterprise Workforce Management Capability for Public Transport Systems

1 Reduce Manual Processes

Manual Processes

Repetitive

Time Taking

Costly

Error Prone

Manual processes result in inconsistent, costly, effort intensive and error prone practices. They are a major source of dissatisfaction for employees and add to operational risk. Automate your Workforce Processes with t3.

Workforce Capacity Planning and Forecasting (RPA)

Forward Demand Planning and Forecasting (RPA)

Roster Generation and Maintenance RPA

Operations Planning and Workforce Scheduling

2 Empower Your Workforce

Transparent workforce management practices through improved digital communication channels with mobility and automated roster management capabilities. Empower your people with Self Service.

Crew Self Service Dashboard

Fully Integrated Solution

Mobile First, Highly Intuitive

3 See the Whole Picture

Real-time visibility of operational status of workforce availability for effective decision making through integrated digital platforms. Consolidate preparedness for now and the future.

4 Gain Agility

Timely, informed and cost effective decision making. Quickly adapt to changing business requirements, compliance and regulations. Gain resiliency by adjusting to changing workforce relationships in the existing "Gig Economy".

Workforce Safety and Compliance Management

Freelance Workforce and Slot Management RPA

Workforce Optimization and Utilization Monitoring (RPA)

Workforce Budgets Management RPA

5 Enhance Customer Satisfaction

Achieve this through the deployment of competent workforce by matching roles with competency profile and business rules.

Workforce Competence Management

Right Person for the Right Job, at the Right Time, at the Right Place
